[View Home Pages](#)

Earth Square Before

I. What is Earth Square?

- A.) Earth Square prevents carpet from being landfilled by renewing older carpet tile.
- B.) The face of the tile is renewed via a revolutionary process.
- C.) A new pattern is then applied via the Milliron Dyeing Process.

II. Why Earth Square?

- A.) It's 100% post consumer recycled content.
- B.) We can renew modular carpet tile for reuse at
- C.) can purchase renewed tile from Milliken.

III. Latest Global Recognition

Earth Square After

First Appearances Entry System

A first impression is important especially in a place of business. This is also true of maintenance and upkeep of the environment in which we work. A high profile cleaning program that maintains entrances at an optimal level will yield positive results for your business.

Keeping entrances and lobbies clean would seem to be an insurmountable task. However, sometimes the resolution to many of our cleaning and maintenance problems is right under our feet, and nowhere is this more the case than when people enter buildings. Approximately 80% of the dirt in a building got there by being carried in on people.

Removing the dirt once it is inside can cost upward of \$600 per pound.

One commercial matting manufacturer indicates that up to 24 pounds of dirt can be tracked into a facility by 1,000 people coming through an entrance in a 20-day work month. Thus, the removal of dirt can be very expensive. The key is to stop the dirt from coming into the building. Using the figures provided, it could cost \$14,400 to remove the dirt monthly or a \$172,800 per year!

Most of the dirt could have been collected at entrances by our First Appearances Product Line. First Appearances is comprised of three phases of product designs. A client may use all for the optimum effect or just one in a targeted application. The phases are as follows:

[EZ-Scrub](#)

[Brush Off](#)

[Clean Sweep](#)

FIG. -12-

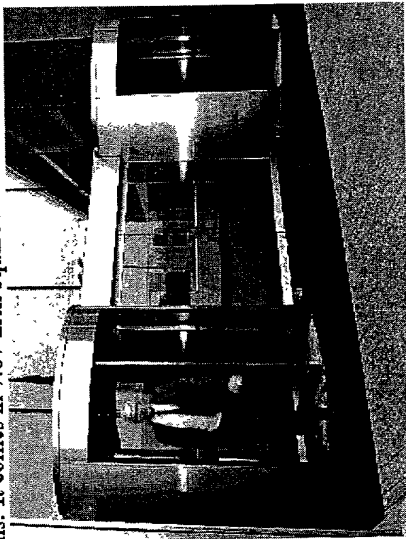

This is a copy of the First Appearances Product Line. It is not a replacement for the original product. It is a copy of the original product.

EZ-Scrub:

This phase is a 100% thermoplastic that is typically deployed on the exterior of a building under an overhang and as a border around Brush Off installations. It comes in 7.67 inch square modules that are easily pieced together.

For more information, please contact your local Milliken representative or visit our website at www.milliken.com.

FIG. 13 is a perspective view of a thermoplastic module 1300, which is a 100% thermoplastic module that is typically deployed on the exterior of a building under an overhang and as a border around Brush Off installations. It comes in 7.67 inch square modules that are easily pieced together.

FIG. -13-

Brush Off:

This phase is a 100% thermoplastic with an engineered textile that is typically deployed on the exterior of a building under an overhang or in air locks. It comes in 7.67 inch square modules that are easily pieced together.

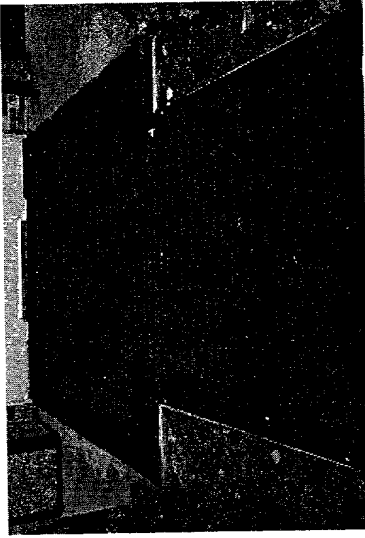

FIG. 14 is a perspective view of the Brush Off material installed on the exterior of a building, showing the modular nature of the material and how it covers the building's facade.

Carpet Standards Program is the collection below in 3'x3' or 18x18" Modular platforms (cut or loop pile finishes)

The site took an inventory of what was on the floor, what was in the stockroom on site and then worked with Milliken Design to come up with patterns and colors that worked with existing finishes and new furniture standards. The team at reduced inventory and the chance that a product would be discontinued in the future. These patterns will also work on old carpet that will be "Earth Squared" and reused at or other sites around the world.
